

DUAL MIKE

The Dual Mike offers instant two-keypress access to all the features you'll need, while providing a safe and legal communications device that can be used while you are on the road.

The two Push-to-Talk buttons are the showstopper feature on the Dual Mike and they give you the flexibility to use PTT 1 for general communications, while PTT 2 can be used for priority communications with those who matter, such as your logistics depot, vehicle dispatcher or other important parties. PTT 2 can also be linked to a traditional two-way radio with one of our Gateway products, enabling instant communications over CB, UHF or VHF frequencies.

Dual Mike features include:

Private Call

Instantly make a secure Private Call to any of your contacts without eavesdropping. You can leave a voicemail if they're busy.

Auto Group Switch Toggle

Toggle Auto Group Switching when entering and leaving locations, such as truck stops and transport hubs.

Contacts

Your contact list allows you to jump to the same channel as a contact, make a private call and listen to messages they left.

Bluetooth Pair

The Dual Mike can be paired with Bluetooth speakers and in-vehicle hands-free and audio systems for true flexibility.

Voicemail

Missed a Private Call? Don't worry! You can listen to messages left by the caller any time and call them right back.

Alerts

Want to avoid delays? Listen to text-to-speech broadcasts of the latest traffic information as you drive on your route.

VOX Support

If you'd rather talk without pressing the PTT buttons, you can use VOX to speak freely and it'll transmit automatically.

Instant Mute

When you can't be interrupted, press and hold the Instant Mute button to toggle audio output. No more chatter!

Technical Specifications

General			
Power Supply	USB Type C 5V	Processor	Xtensa LX6 @ 240 MHz
Operating Temperature	-10°C - 45°C	Input	18-key Keypad & Dual PTT
